## **Narcissus 'Mite'** - by Dave Hardy

The story of Mite is equally as exciting as the flower itself! This division 6 cyclamineus hybrid originates from Lissadell House, County Sligo, flowering for the first time back in 1935. Bred by Sir Josslyn Gore-Booth, the brother of Constance Markievicz the Irish politician and suffragette, and friend of Poet William Yeats.

Mite has a distinctive long corona and reflexed petals. It flowers early in the season and looks great in rockeries and also in pots.
